RemindOCR

Know what expires next. Have time to act.

Document tracking and email reminders for everyday business.

Bring the paperwork together

Contracts, certificates, permits and the dates that need your attention.

Turn dates into follow-up

Review important details, schedule reminders and see what is coming next.

remindocr.com/en

One workflow, from document to renewal

Less time searching for dates. More time to prepare.

01 Collect

Upload a document or import eligible attachments from a connected Gmail account.

02 Review

OCR and AI help extract details. Check the client, document information and dates.

03 Track

Keep records linked and see upcoming expiry dates in your dashboard.

04 Follow up

Configure email reminders, review delivery state and export reports.

A document becomes a plan of action

The business workflow at a glance

Review

Confirm the date

Remind

Email follow-up

Review is the decision point: confirm extracted details before relying on a renewal date.

Capture documents and useful details

Intake and extraction features

Browser uploads and Gmail

Bring in supported documents and email attachments; upload and Gmail imports share the plan allowance.

Text, scans and images

PDF parsing and OCR, with Hebrew and English support. The pipeline also includes Word, Excel and text parsers.

Assisted extraction

Extract business details and dates, then review and correct values before relying on them.

Visible processing

Background jobs, processing status, retries and duplicate detection help manage imports.

Keep documents connected to the work

Document and contract management

Find the source

Search and filter documents, access original files and open related business records.

Maintain contract records

Create, edit and clone records; associate clients and source documents with the relevant dates.

Store and export

Configured object storage keeps source files available; eligible accounts can export to Google Drive.

Track what needs attention

Review expiry dates, upcoming renewals and duplicate report numbers in the relevant workflows.

Give every important date a next step

Reminders and notifications

Advance email reminders

Configure reminders around important dates and send client reminders using reusable email templates.

Delivery visibility

Review reminder records and delivery state to support follow-up.

Upcoming-date view

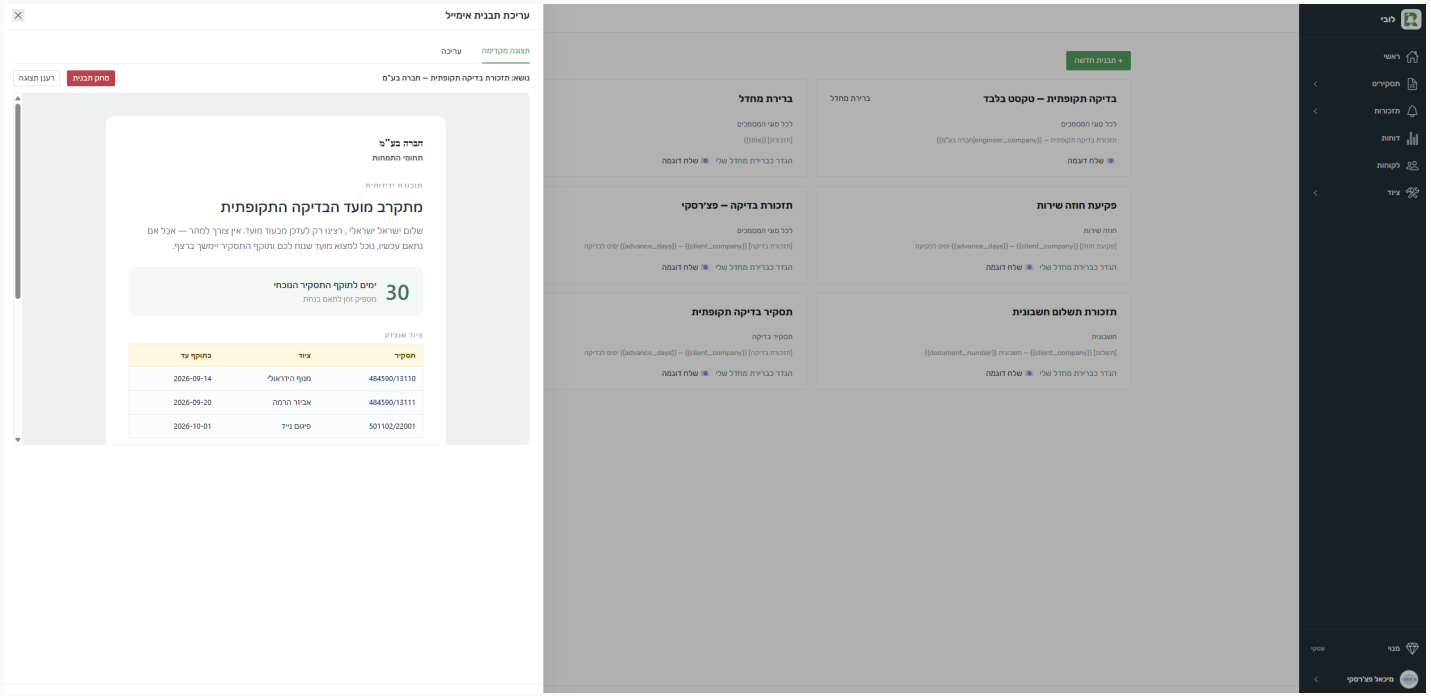

Use dashboard summaries and the expiry calendar to plan the next period.

Connected notifications

In-app read/unread notifications; configured browser push and Business Google Calendar integration.

A useful reminder, ready to review

Preview the message / Review relevant records / Follow up before expiry

User-supplied screenshot, September 2026. Figures illustrate this account, not typical results.

See the business context

Clients, dashboard and account tools

Client records

Maintain contact information and relationships to documents and contracts.

Operational dashboard

See document and client summaries, pending work, recent activity and upcoming expiries.

Search and preferences

Search business records, filter lists and manage profile, business and notification settings.

Account access

Google and email sign-in, email verification and account-recovery flows.

Make recurring work easier to repeat

Tasks, templates and business identity

Follow-up tasks

Create, list and update tasks alongside the document workflow.

Document templates

Maintain reusable document templates, with AI-assisted generation from text.

Email templates

Edit reusable messages, preview variables and reminder emails, and use test-email workflows.

Your business materials

Upload a business logo and template assets; import structured reminder tables through the supported workflow.

Turn records into useful reports

Reporting and invoice features

Export and share

Excel exports and monthly report download/email workflows on eligible plans.

Contract reporting

Monthly contract PDF reports and linked source records for follow-up.

Invoice and receipt records

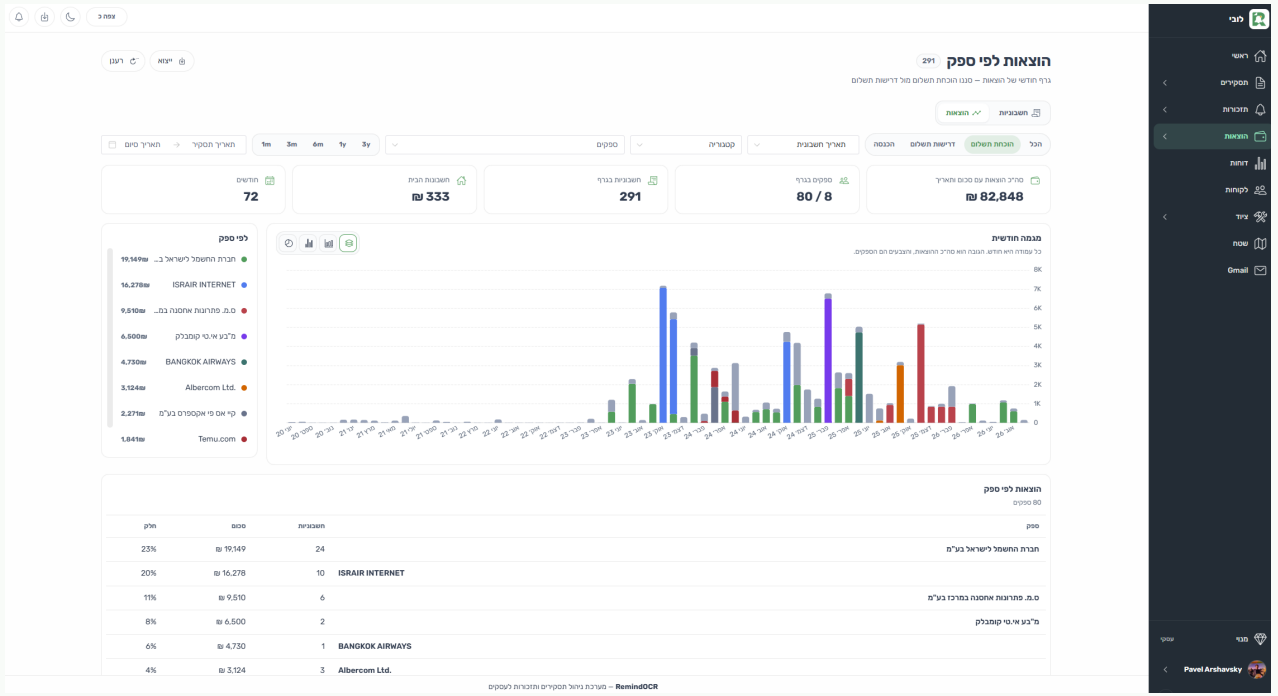

Review and edit extracted fields, organize vendor categories and merge vendors.

Expense visibility

Monthly expense analysis and six-month report emails. Business adds extended Gmail invoice-history import.

See where expenses accumulate

One record connects the follow-up

How the product information fits together

Keep the original, the customer and the next action connected.

Specialist tools when your work needs them

Inspection and equipment workflows

Equipment register

Manage categories, inspection history and linked reports. Equipment category is separate from a machine's name.

Manual inspections and PDFs

Create inspection records and generate report PDFs using configurable print templates.

Spreadsheet intake

Import equipment lists with a preview and confirmation step; review duplicate report numbers.

Field work

Business includes equipment photos and checklists. Digital supports manual workflows without imports or AI.

Connect the services you already use

Availability depends on the plan and configured accounts.

Gmail

Connect email accounts, search eligible history and process imports in the background.

Google Drive

Export documents through the connected account on eligible plans.

Google Calendar

Synchronize relevant dates on Business with a connected Google account.

Email and optional channels

Email reminders use the configured provider. Browser push and WhatsApp require separate configuration and availability checks.

Choose the workflow that fits

English-market list prices for new subscriptions

Trial

$0

30 days
20 imports total

Digital

$45

Per month
Manual workflows

Basic

$75

Per month
50 imports / month

Business

$119

Per month
Unlimited imports

Prices and subscription terms are confirmed before payment. Existing subscriptions follow agreed terms. Upload and Gmail imports share the quota.

Know the limits before you start

Plan details that matter

Trial: try the document workflow

30 days, no credit card and 20 imports total. Calendar and field work are excluded.

Basic: regular document intake

50 imports per month, OCR/AI, storage/Drive, reminders and reports.

Business: broader coverage

Unlimited catalog document imports; Calendar and field work; 24-month inspection and 36-month invoice Gmail history.

Digital: manual inspection work

Manual records, generated PDFs, reminders and reports. No imports, AI or file-storage entitlement.

Behind the customer workflow

Administrator and optional capabilities

Account administration

User and plan controls, feature configuration and operational settings.

Processing operations

Background-job controls and diagnostics for imports, storage and delivery.

Outreach tools

SEED lead management, campaigns and unsubscribe scanning are administrator tools, separate from the core customer offer.

Configured modules

WhatsApp queue/provider integration and optional services require setup; confirm availability before including them in a proposal.

Show the value in five minutes

A practical demonstration using sample business data

Start with a real use case

Upload a sample service agreement or certificate and review the extracted customer and expiry date.

Make the next step visible

Open the linked record, set a reminder schedule and show the upcoming-expiry dashboard.

Close the loop

Preview the reminder email and export a report. Add Drive or Business Calendar if connected.

Start a trial

Visit remindocr.com/en for the document-tracking workflow and current plan information.

Feature coverage and product notes

Product snapshot: 25 September 2026

Core coverage

Documents, OCR/AI, contracts, dates, clients, reminders, notifications, dashboards, search, reports and account tools.

Extended coverage

Invoices/expenses, equipment/inspections, print templates, field work, Google integrations and administrator operations.

Availability and accuracy

Plans, feature flags and connected services govern access. Review extracted values. No guaranteed extraction accuracy, regulatory certification or native e-signature claim is made.
